Dr. Patrick is a Professor of Family and Preventive Medicine at the University of California. He is a senior advisor to the Robert Wood Johnson Active Living Research Program and is a member of the National Advisory Committee of the Foundation's program in Health Games Research. Dr. Patrick is Director of the Center for Wireless and Population Health Systems at the California Institute for Telecommunications and Information Technology (Calit2).

Dr. Patrick served as a member of the Armed Forces Epidemiological Board from 2000-2005, is a past president of the American Public Health Association, and is a recipient of the 2007 Robert Wood Johnson Foundation Health Game Research Award. He has been PI or Co-PI on more than $40 million in research and training grants funded by the NIH, CDC, HRSA and others.

His current research explores how to use wireless technologies to enable patients and consumers to optimize health and wellness by improving fitness, sleep, diet, and lifestyle.
