Dr. Patrick is a Professor of Family and Preventive Medicine at the University of California, San Diego, and is the Director of the Center for Wireless and Population Health Systems at the California Institute for Telecommunications and Information Technology (Calit2).

Dr. Patrick served as a member of the Armed Forces Epidemiological Board from 2000-2005, is a past president of the American Public Health Association, and is a senior advisor to the Robert Wood Johnson Active Living Research Program. He is a member of the National Advisory Committee of the Foundation’s program in Health Games Research.

His current research explores how to use wireless technologies to enable patients and consumers to optimize health, physical activity, diet and lifestyle.

Dr. Patrick has been PI or Co-PI on more than $40 million in research and training grants funded by the NIH, CDC, HRSA and others. He has authored over 130 peer-reviewed articles, book chapters and commentaries.
